

Women In Space

Chapter

For everybody who shares the vision of equity and diversity in the space sector in Australia.

What we are working towards:

Awareness.

Of the amazing achievements of under-represented groups within the space sector, and of the unique challenges which these groups encounter within their fields.

Advocacy.

Working with organisations and the general public to advocate for equity and inclusion in the space sector, and minimising the barriers which can prevent women and minority groups from entering or persisting within their field.

Mentorship.

Providing and facilitating mentorship for students who have a passion for space.
